

$$n = 6$$

$$\alpha = \frac{180(n-2)}{n} = 120^\circ$$

$$\sum \alpha = 120 \cdot 6 = \underline{\underline{720^\circ}}$$

$$\underline{\underline{n = 9}}$$

$$\sum = 1260^\circ$$

Окружность

$\angle ACB$ - вписанный

$\angle AOB$ - центральный!

$$\angle AOC = 208^\circ$$

$$\angle AOD = \angle AOC - \angle COA = 208 - 132 = 76^\circ$$

$$\angle ABD = \frac{76}{2} = 38^\circ$$

$$\angle ABC = 110^\circ$$

$$\angle ABD = 70^\circ$$

$$\angle CAD = ?$$

$$||$$

$$\angle ABD = ?$$

$ACB?$

$$AB = 100$$

$\angle ABC$?

$$\angle A C = \frac{360}{5} = 72^\circ$$

$$\frac{17}{36}$$

$$UAB = 46 \text{ cm}$$

$$UAB = 360 - 2 = 358^\circ$$

$$\frac{46}{x} = \frac{UAB_1}{UAB_2}$$

$$= \frac{2}{358}$$

$$\frac{46 \cdot 358}{2} = x$$

$$x = 8234$$

U AB?

$$\frac{8}{352} = \frac{88}{x}$$

$$x = 3872$$

$\angle ABC$ HA 42°
MENGEN

$\angle AOC$

$\angle ABC?$

$$2x - x = 42$$

$$X = 42$$

BC?

$$OR = 3$$

$$\angle B + \angle O = 180^\circ$$

$\angle AOB?$

$$S = \pi R^2$$

На клетчатой бумаге нарисовано два круга. Площадь внутреннего круга равна 9. Найдите площадь заштрихованной фигуры.

$$S = q = \pi \cdot R_1^2$$

$$R_1^2 = \frac{q}{\pi}$$

$$R_1 = \sqrt{\frac{q}{\pi}} = \frac{3}{\sqrt{\pi}}$$

$$1k = \frac{R_1}{3} = \frac{1}{\sqrt{\pi}}$$

$$S = \pi \cdot (4k)^2 = \pi \cdot \frac{16}{\pi} = 16$$

$$S = 7$$
